DETAILED ACTION
EXAMINER'S AMENDMENT

Replace:

Claim 2

In a semiconductor memory module divided into banks and having an address structure in which each address is associated with a bank organized in rows and columns and defined with a row address, a column address, and a bank address, a method for comparing a memory access address with a known address of a faulty memory cell, the method which comprises the following steps:

Claim 2

In a semiconductor memory module divided into banks and having an address structure in which each address is associated with a bank organized in rows and columns and defined with a row address, a column address, and a bank address, a method for comparing a memory access address with a known address of a faulty memory cell, the method which comprises the following steps, to be carried in parallel with a memory cell access in a two cycle access:

Allowable Subject Matter

Claims 2 and 3 are allowed.

The following is an examiner's statement of reasons for allowance:

Art Unit: 2114

In view of the applicants amendments and arguments these claims are allowable over the prior art. The specific steps of comparison and signal combinations done in two cycles is unique over the prior art. As applicant points out the element of carrying out the test operations in parallel to the memory cell access in two cycles is the most limiting limitation. The other limiting limitation, which the applicant argues would be the "third logic stage" which the three specified signals are combined for an output is also unique over the prior art. These limitations in combination with the other elements of claims 2 and 3 make them allowable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
